Executive Overview {#executive-overview}

What You're Building

A service-based AI automation business that helps SMBs automate repetitive workflows using AI + no-code/low-code tools. Start as a service (monthly retainer), evolve into productized offerings.

Why This Works in 2025

- **Market Gap:** SMBs want AI benefits but lack internal expertise
- **Proven Pain:** Businesses lose 20-30 hours/week on repetitive tasks
- **Low Competition:** Most agencies talk about AI; few deliver practical solutions
- **Quick ROI:** Clients see value within 2-4 weeks

Investment Required

- **Capital:** ₹0 (start with free tools)
- **Time:** 60-80 hours/week for first 2 months
- **Skills:** Basic tech literacy (can be learned in 2 weeks)

Revenue Potential

- **Month 1-2:** ₹0-30k (learning + first client)
 - **Month 3-4:** ₹1-2L (3-5 clients)
 - **Month 6:** ₹3-5L (8-10 clients)
 - **Month 12:** ₹10-15L (20+ clients or productized)
-

Phase 0: Pre-Launch Preparation (Week 1-2) {#phase-0}

Week 1: Skills & Tools Setup

Day 1-2: Foundation Learning

Morning (3 hours):

- Watch: "Make.com Complete Tutorial for Beginners" on YouTube
- Create free Make.com account
- Complete their built-in tutorial scenarios

Afternoon (3 hours):

- Watch: "OpenAI API for Beginners"
- Sign up for OpenAI account (\$5 free credit)
- Test basic API call in Make.com

Evening (2 hours):

- Watch: "How to Build a Chatbot with OpenAI"
- Document what you learned in a Notion page

Homework:

- List 10 businesses you know personally

- Identify one repetitive task each business might have

Day 3-4: Build Your First Demo

Project: Email Auto-Responder

Morning (4 hours):

Demo Scope:

- Trigger: New email arrives in Gmail
- Action: OpenAI reads email and categorizes it
- Response: Auto-reply with relevant template
- Notification: Alert you if urgent

Step-by-step Build:

1. Open Make.com, create new scenario
2. Add Gmail "Watch Emails" trigger
3. Add OpenAI "Create Completion" module
4. Prompt: "Categorize this email as: Sales Inquiry, Support Request, or General. Email: {{email body}}"
5. Add Router based on category
6. Add Gmail "Send Email" for each route
7. Test with 5 sample emails

Afternoon (3 hours):

- Debug issues (Google every error)
- Refine the prompt for better accuracy
- Create a 2-minute screen recording demo

Evening (1 hour):

- Write simple explanation: "This saves 10 hours/week by auto-responding to common emails"

Day 5-6: Build Second Demo

Project: Lead Qualification Chatbot

Morning (4 hours):

Demo Scope:

- User fills Google Form with business inquiry
- OpenAI scores lead (Hot/Warm/Cold)
- Hot leads → instant email to business owner
- All leads → added to Google Sheet

Build Steps:

1. Create Google Form (Name, Email, Budget, Need)
2. Make.com scenario triggered by form submission
3. OpenAI analyzes responses
4. Router sends to different actions
5. Store in Google Sheet

Afternoon (2 hours):

- Test with 10 sample submissions
- Record demo video

Evening (2 hours):

- Create simple slide deck:
 - Slide 1: "I Build AI Automations for SMBs"
 - Slide 2: Demo 1 (email responder)
 - Slide 3: Demo 2 (lead qualifier)
 - Slide 4: "Let's find what you need"

Day 7: Rest & Reflection

- Review your demos
- Can you explain them simply to a non-tech person?
- If no, spend today simplifying your pitch

Week 2: Market Research & Positioning

Day 8-9: Choose Your Niche

Why Niche Matters:

- Easier to find prospects

- Speak their language
- Build reusable solutions

Best Starting Niches (Pick ONE):

1. Dental/Medical Clinics

- Pain: Appointment no-shows, follow-ups
- Automation: Reminder SMS, review requests
- Size: 50,000+ clinics in India

2. Recruitment Agencies

- Pain: Screening 100s of resumes
- Automation: Initial screening, interview scheduling
- Size: 15,000+ agencies

3. Real Estate Brokers

- Pain: Lead follow-ups, property inquiries
- Automation: Lead qualification, appointment booking
- Size: 100,000+ brokers

4. Coaching/Training Businesses

- Pain: Student onboarding, payment follow-ups
- Automation: Course delivery, feedback collection
- Size: 20,000+ businesses

5. E-commerce (Shopify stores)

- Pain: Order updates, customer support
- Automation: Order tracking bot, return processing
- Size: 500,000+ stores

Your Task:

- Choose based on: (1) Who you know, (2) What interests you, (3) Market size
- Research 10 businesses in this niche locally
- Note their common workflows

Day 10-11: Create Your Service Menu

Package 1: "Starter Automation" - ₹15,000 setup + ₹10,000/month

- 1-2 automation workflows
- Email support
- Monthly optimization call
- Perfect for: Testing the waters

Package 2: "Growth Automation" - ₹30,000 setup + ₹20,000/month

- 3-5 automation workflows
- Priority support
- Bi-weekly optimization
- Monthly reporting
- Perfect for: Committed businesses

Package 3: "Custom Enterprise" - ₹50,000+ setup + ₹35,000+/month

- Unlimited automations
- Dedicated support
- Custom integrations
- Weekly strategy calls
- Perfect for: Scaling businesses

Create Service Document:

Title: "AI Automation Services for [Your Niche]"

Section 1: The Problem

- List 5 pain points specific to your niche
- Example: "Dental clinics lose ₹50,000/month from no-shows"

Section 2: The Solution

- Show how automation solves each pain
- Include your demo videos

Section 3: Packages

- List all 3 packages clearly
- Add "Most Popular" tag to Package 2

Section 4: Process

- Step 1: Free 30-min audit call
- Step 2: Custom automation plan
- Step 3: Build & test (1-2 weeks)
- Step 4: Train your team
- Step 5: Ongoing support

Section 5: About You

- Keep it simple: "I help [niche] save time with AI automation"

Day 12-13: Build Your Online Presence (Minimal)

LinkedIn Profile Update:

- Headline: "AI Automation Specialist for [Niche] | Saving 20+ Hours/Week"
- About: 3 paragraphs
 - Para 1: What you do
 - Para 2: Who you help
 - Para 3: How to work with you
- Featured: Upload your demo videos

Free Website (Optional but Recommended):

- Platform: Carrd.co (free) or Google Sites (free)
- 1-page site structure:
 - Hero: "Automate Your [Niche] Business with AI"
 - Problem: 3 pain points
 - Solution: 3 automations you offer

- Demos: Embed videos
- CTA: "Book Free Audit" → Calendly link
- Footer: Your contact

Calendly Setup (Free):

- Create "Free Automation Audit" event (30 min)
- Add questions:
 - What's your biggest time-consuming task?
 - How many hours/week does it take?
 - What's your monthly revenue?

Day 14: Outreach Prep

Create Prospect List:

- Find 50 businesses in your niche
- Use: Google Maps, LinkedIn, local directories
- Collect: Name, email, phone, LinkedIn

Template Spreadsheet:

Column A: Business Name
Column B: Contact Name
Column C: Email
Column D: Phone
Column E: LinkedIn URL
Column F: Outreach Date
Column G: Response (Yes/No/Maybe)
Column H: Notes

Write Outreach Messages (Templates in Sales Section)

- DM template for LinkedIn
 - Cold email template
 - Follow-up template
 - WhatsApp template (if you have phone numbers)
-

Phase 1: First Client Acquisition (Week 3-6) {#phase-1}

Week 3: Mass Outreach

Daily Schedule (Monday-Friday)

Morning Routine (9 AM - 12 PM):

- Send 10 LinkedIn connection requests with personalized note
- Send 10 cold emails
- Engage with 20 posts in your niche (comment, like)

Afternoon Routine (2 PM - 5 PM):

- Follow up with connections who accepted
- Respond to any replies
- Research businesses for tomorrow's outreach

Evening (6 PM - 8 PM):

- Update your spreadsheet
- Refine your pitch based on responses
- Learn one new Make.com feature

Outreach Metrics to Track:

- Messages sent: Target 50/week
- Responses: Expect 10-15%
- Calls booked: Target 2-3/week

Outreach Message Examples

LinkedIn Connection Request:

Hi [Name],

I noticed you run [Business Name]. I'm helping [niche] businesses automate repetitive tasks with AI.

Built a system that saves clinics 20+ hours/week on appointment reminders and follow-ups.

Would love to connect and share ideas.

- [Your Name]

Follow-up After Connection:

Thanks for connecting, [Name]!

Quick question: What's the most time-consuming repetitive task in your business right now?

I'm offering free 30-min automation audits this month. I'll show you 2-3 things you could automate immediately (no strings attached).

Interested? Here's my calendar: [Calendly link]

Cold Email Template:

Subject: Save 20 hours/week at [Business Name]?

Hi [Name],

I help [niche] businesses automate their repetitive workflows using AI.

For example, I recently built:

- Auto appointment reminders (eliminated 80% no-shows)
- Lead qualification chatbot (saved 15 hours/week)
- Invoice follow-up system (improved cash flow by 30%)

I'm offering free automation audits this month. I'll:

- ✓ Identify 3 workflows you can automate
- ✓ Show you exactly how it works (live demo)
- ✓ Give you the roadmap (even if we don't work together)

30 minutes. Zero obligation.

Interested? Reply with your availability or book here: [Calendly]

Best,

[Your Name]

[Phone]

Week 4: Audit Calls & Closing

Pre-Call Preparation (15 mins before each call)

Research Checklist:

- Visit their website
- Check social media (last 3 posts)
- Note any obvious pain points
- Prepare 3 questions specific to them

Call Setup:

- Use Google Meet (free)
- Have Make.com open to show demos
- Have a Google Doc ready for notes

The Perfect Audit Call (30 Minutes)

Minutes 0-5: Build Rapport

Script:

"Hey [Name], thanks for your time! Before we dive in, tell me a bit about [Business Name]. How long have you been running it?"

[Listen actively, take notes]

"That's great. So what made you interested in automation?"

Minutes 5-15: Pain Discovery

Key Questions:

1. "Walk me through your typical day. Where do you spend most of your time?"
2. "What tasks do you find yourself repeating every single day?"
3. "If you could wave a magic wand and eliminate one task, what would it be?"
4. "How much time per week do you think you spend on [task they mentioned]?"
5. "What have you tried before to solve this?"

[TAKE DETAILED NOTES]

Minutes 15-25: Show Solution

Transition:

"Okay, based on what you've shared, I can see 3 things we could automate immediately. Let me show you..."

[Share screen, show relevant demo]

"This is how it would work for your business:

- [Explain in their context]
- It would save you roughly [X] hours per week
- Setup would take about 1 week"

[Show second demo if relevant]

"Does this make sense? Any questions?"

Minutes 25-30: Close

If they're interested:

"Great! So here's how we'd move forward:

Package 1: [Explain briefly]

Package 2: [Explain briefly - recommend this one]

For your situation, I'd recommend Package 2 because [reason].

That's ₹30,000 to build it out + ₹20,000/month to maintain and optimize.

We'd start with [specific automation they want most], get that working perfectly, then add the others.

Does that work for you?"

If they say yes:

"Perfect! I'll send you a simple agreement today. Once you sign and send 50% advance (₹15,000), I'll start building this week."

If they hesitate:

"What concerns do you have?"

[Address concerns]

"How about this: Let's start with just ONE automation. ₹15,000 total. If you love it, we expand. If not, no hard feelings. Deal?"

After the Call

Immediate Actions:

1. Send thank you email within 1 hour
2. Send proposal/agreement same day
3. Add reminder to follow up in 2 days if no response

Follow-up Email:

Subject: [Business Name] Automation Plan

Hi [Name],

Great talking to you today! Here's what we discussed:

Current Situation:

- You're spending [X] hours/week on [task]
- This is costing you roughly [Y] in opportunity cost

Solution:

- Automate [specific workflows we discussed]
- Expected time savings: [X] hours/week
- Setup time: 1-2 weeks

Investment:

- Package 2: ₹30,000 setup + ₹20,000/month
- Includes: [list everything]

Next Steps:

1. Review the attached agreement
2. Sign and return
3. Send 50% advance (₹15,000) to [bank details]
4. I'll start building immediately

Questions? Just reply to this email or call me at [number].

Looking forward to working with you!

[Your Name]

Week 5-6: Convert or Keep Hunting

Goal: Get Your First Paying Client

If You Get a YES:

- Immediately send agreement
- Get 50% advance before starting work
- Schedule kickoff call
- Jump to Phase 2

If You Get Multiple YESes:

- Take maximum 2 clients in first month

- Better to over-deliver for 2 than under-deliver for 5

If You Get MAYBEs:

- Follow up every 3 days
- Share case studies or additional demos
- Offer limited-time discount (20% off setup)

If You're Getting NOs:

- Ask: "What would need to change for this to be a yes?"
 - Refine your pitch based on feedback
 - Try different niche if needed
 - Double down on outreach (100 messages/week)
-

Phase 2: Delivery & Refinement (Week 7-10) {#phase-2}

Week 7: Project Kickoff

Day 1: Discovery & Planning

Kickoff Call (1 hour):

Agenda:

1. Reconfirm requirements (10 min)
2. Get access to their systems (20 min)
3. Walkthrough of their current process (20 min)
4. Set expectations & timeline (10 min)

Access Checklist:

- Gmail/Email access (app password or forwarding)
- CRM login (if they have one)
- Google Sheets (shared with your account)
- Any other tools they use

Document Everything: Create a project doc:

Client: [Name]

Package: [Which one]

Start Date: [Date]

Payment Status: [50% received]

Automations to Build:

1. [Automation 1]

- Trigger: [What starts it]

- Actions: [What it does]

- Completion: [Date]

2. [Automation 2]

...

Weekly Check-in: [Day/Time]

Day 2-6: Build First Automation

Day 2: Architecture Planning

- Draw out the workflow on paper
- List all Make.com modules needed
- Identify potential issues

Day 3-4: Build & Test

- Build in Make.com
- Test with sample data
- Fix bugs

Day 5: Client Testing

- Share test link/access with client
- Have them test with real data
- Collect feedback

Day 6: Refinement

- Make requested changes
- Add error handling
- Document how it works

Week 8-9: Complete All Automations

Repeat the process for each automation:

- Plan (1 day)
- Build (2 days)
- Test (1 day)
- Refine (1 day)

Pro Tips:

- Build simplest version first
- Get client approval before adding complexity
- Document as you build (for future clients)

Weekly Check-in Call:

Agenda:

- What's been completed
- What's in progress
- Any blockers
- Timeline update
- Answer their questions

Week 10: Handoff & Training

Training Session (1 hour)

Part 1: How It Works (20 min)

- Show them each automation running
- Explain what happens behind the scenes
- Show them how to check if something fails

Part 2: How to Use It (30 min)

- Walk through their new daily workflow
- Show them the dashboard (if you built one)
- Demonstrate how to handle edge cases

Part 3: Support (10 min)

- Explain your monthly retainer includes:
 - Monitoring for failures
 - Monthly optimization
 - Unlimited support requests
- Give them your WhatsApp/phone for urgent issues

Handoff Checklist

Deliver:

- Login credentials (organized in Google Doc)
- Process documentation (how each automation works)
- Troubleshooting guide (what to do if X fails)
- Contact info for support

Collect:

- Remaining 50% payment
 - Testimonial request (send in 2 weeks)
 - Referral request ("Know anyone else who needs this?")
-

Phase 3: Scale to 5 Clients (Month 3-4) {#phase-3}

Month 3: Leverage Your First Win

Week 11-12: Case Study & Referrals

Create Case Study:

Title: "How [Client Name] Saved 20 Hours/Week with AI Automation"

Section 1: The Challenge

- Business: [Industry, size]
- Problem: [Specific pain points]
- Cost: [Time/money wasted]

Section 2: The Solution

- What we built: [List automations]
- Technology: [Tools used]
- Timeline: [How long it took]

Section 3: The Results

- Time saved: [X hours/week]
- Money saved: [₹Y/month]
- Other benefits: [Better customer experience, etc.]
- Client quote: "[Testimonial]"

Section 4: How It Works

- [Brief technical overview]
- [Screenshot/video]

CTA: "Want similar results? Book a free audit: [link]"

Ask for Referrals:

Email/Message:

"Hey [Client Name],

Hope the automations are working great! Quick question:

Do you know any other [niche] businesses struggling with [problem]?

I'm taking on 3 more clients this month. Since you've seen the results firsthand, your referral would mean a lot.

I'll give them priority treatment + you'll get [10% commission or 1 month free service].

Just intro me via email or WhatsApp. Thanks!

[Your Name]"

Week 13-14: Content Marketing

LinkedIn Posts (3x/week):

Post Type 1: Behind the Scenes

"Just automated 15 hours/week of work for a [niche] business.

Here's what we built:

→ [Automation 1]

→ [Automation 2]

→ [Automation 3]

The owner told me: '[quote]'

This is why I love what I do.

Running a [niche] business? Let's talk: [Calendly link]"

Post Type 2: Educational

"3 tasks every [niche] business should automate TODAY:

1. [Task 1]

Why: [Reason]

How: [Brief explanation]

2. [Task 2]

...

3. [Task 3]

...

Automating these = 10+ hours saved per week.

Want help setting this up? DM me 'Automate'."

Post Type 3: Results

"Week 1: Client was manually following up with 50 leads/day

Week 4: AI handles it automatically

Result:

✓ 100% follow-up rate (was 30%)

✓ 2x conversion rate

✓ 15 hours/week saved

[Client Name] said: '[Testimonial]'

This is the power of simple AI automation.

[Include screenshot/video]"

Month 4: Systemize & Scale

Create Service Templates

For each automation you've built:

- Save the Make.com scenario as template
- Document setup process step-by-step
- Create client-facing setup checklist

Example Template Doc:

Automation: "Appointment Reminder System"

What it does:

- [Description]

Setup time: 3 hours

Requirements:

- Google Calendar access
- Phone number list
- Twilio account (optional)

Build process:

1. [Step 1 with screenshot]
 2. [Step 2 with screenshot]
- ...

Common issues:

- [Issue 1]: [Solution]
- [Issue 2]: [Solution]

Pricing: ₹12,000 (part of package)

Optimize Your Funnel

Track Your Numbers:

Outreach → Response → Call → Close

Week 1:

- Sent: 50 messages
- Responses: 7 (14%)
- Calls: 3 (43% of responses)
- Closed: 1 (33% of calls)

Identify bottleneck and improve.

Improve Based on Data:

- Low response rate → Improve messaging
- Low call booking → Improve offer
- Low close rate → Improve pitch/pricing

Hire Help (Optional)

If you're overwhelmed, outsource:

- VA for outreach (₹10k/month)
- Junior dev for simple builds (₹15k/month)
- Sales person on commission (20% of deals)

Only hire when:

- You're making ₹1L+/month consistently
 - You have more leads than you can handle
 - You're spending time on tasks others can do
-

Phase 4: Systemization (Month 5-6) {#phase-4}

Month 5: Build Your Productized Service

Identify Most Common Automations: Review your clients. What do most of them need?

Example: "The Clinic Automation Bundle"

- ₹40,000 setup (was ₹50k custom)
- Includes:
 - Appointment reminder system
 - Review request automation
 - No-show follow-up
 - Patient birthday wishes
- Setup time: 1 week (was 2-3 weeks custom)

Create 3 Product Packages:

Product 1: "Essential [Niche] Automation" - ₹30,000

- 3 pre-built automations
- 1-week setup
- 3 months support included
- Perfect for: New businesses

Product 2: "Professional [Niche] Automation" - ₹55,000

- 6 pre-built automations
- 2-week setup
- 6 months support
- Monthly optimization
- Perfect for: Growing businesses

Product 3: "Enterprise [Niche] Automation" - ₹1,00,000

- All pre-built automations
- Custom additions
- Priority support
- Quarterly strategy sessions
- Perfect for: Established businesses

Month 6: Marketing Acceleration

Launch Your Product

Create Product Landing Page:

Structure:

- Hero: "Complete [Niche] Automation in 7 Days"
- Problem: "Stop wasting 20 hours/week on..."
- Solution: "Get [X] automations installed"
- Features: [List what's included]
- Pricing: [Show all 3 packages]
- Social Proof: [Testimonials + case studies]
- FAQ: [Common questions]
- CTA: "Start Automating Today"

Launch Campaign:

- Email all past leads
- Post on LinkedIn 5x over 2 weeks
- Offer early bird discount (20% off)
- Run paid ads (₹10k budget)

Paid Ads (Once You Have Budget)

LinkedIn Ads:

- Target: [Niche] business owners in India
- Budget: ₹300/day
- Ad: Carousel showing before/after
- CTA: "Book Free Demo"

Google Ads:

- Keywords: "[Niche] automation", "AI for [niche]"
- Budget: ₹200/day
- Landing page: Your product page

Track ROI:

Spent: ₹15,000
Leads: 25
Calls: 10
Clients: 3
Revenue: ₹1,65,000
ROI: 10x

Phase 5: Scale to ₹10L+/Month (Month 7-12) {#phase-5}

The Three Paths to ₹10L+/Month

Path 1: Service Scale (20+ clients)

- ₹50,000 average per client
- 20 clients = ₹10L/month
- Requires: Team of 3-4 people
- Time intensive but proven

Path 2: Product Scale (100+ customers)

- ₹30,000 average per customer
- Lower touch, more volume
- Requires: Marketing + systems
- Higher leverage

Path 3: Hybrid (10 service + 50 product)

- 10 enterprise clients at ₹70k each = ₹7L
- 50 product customers at ₹6k each = ₹3L
- Best of both worlds
- Recommended approach

Building Your Team

Hire Order:

Hire #1: Sales/BDR (Month 7)

- Salary: ₹30k + 10% commission
- Role: Lead outreach, book calls
- When: You're closing 4+ deals/month

Hire #2: Junior Automation Engineer (Month 8)

- Salary: ₹35-40k
- Role: Build standard automations
- When: You have 10+ clients

Hire #3: Customer Success Manager (Month 10)

- Salary: ₹30-35k
- Role: Client onboarding, support
- When: You have 15+ clients

Hire #4: Senior Engineer (Month 12)

- Salary: ₹60-80k
- Role: Complex builds, training junior
- When: Revenue is ₹8L+/month

Transition to Product

Month 7-9: Build SaaS MVP

Option 1: No-Code SaaS

- Use: Bubble.io or FlutterFlow

- Build: Dashboard for clients to self-service
- Features:
 - Pre-built automation templates
 - Drag-and-drop customization
 - One-click install
 - Analytics dashboard

Option 2: Code-Based SaaS

- Tech: React + Node.js + Supabase
- Build: Full platform
- Costlier but more control

Pricing:

- ₹5,000/month per user
- Target: 100 users = ₹5L MRR
- Sell alongside services

Month 10-12: Scale Marketing

Content Machine:

- 1 case study per week
- 5 LinkedIn posts per week
- 1 YouTube tutorial per week
- 2 blog posts per month

Partnerships:

- Partner with complementary services
- Example: Partner with website designers
- They refer clients, you split 20%

Events & Speaking:

- Speak at [Niche] conferences
- Host webinars
- Local business meetups

Technical Implementation Guide {#technical-guide}

Core Tech Stack

Phase 1 (Month 1-3): Free/Low Cost

Automation: Make.com (Free → \$10/month)

AI: OpenAI API (\$20-50/month)

Database: Google Sheets (Free)

Forms: Google Forms (Free)

Email: Gmail (Free)

Scheduling: Calendly (Free)

Website: Carrd.co (Free)

Documentation: Notion (Free)

Total: ₹0-5,000/month

Phase 2 (Month 4-6): Growing

Automation: Make.com Pro (\$19/month)

AI: OpenAI + Anthropic (\$100/month)

Database: Airtable (\$20/month)

CRM: HubSpot/Zoho (Free tier)

Website: Webflow (\$14/month)

Analytics: Google Analytics (Free)

Communication: Slack (Free)

Total: ₹10,000/month

Phase 3 (Month 7-12): Scaling

Automation: Make.com Enterprise (\$99/month)

AI: Multiple providers (\$500/month)

Database: Supabase (\$25/month)

CRM: HubSpot Starter (\$45/month)

Hosting: Vercel (\$20/month)

Monitoring: Sentry (Free)

Team: Slack Pro (\$8/user/month)

Total: ₹50,000/month

Building Blocks Library

Block 1: Email Auto-Responder

Trigger: Gmail - Watch Emails

Module: OpenAI - Create Chat Completion

Prompt: "You are an AI assistant for [Business].

Analyze this email and:

1. Determine if it's spam/irrelevant (respond: SPAM)
2. If it's a sales inquiry (respond: SALES)
3. If it's support (respond: SUPPORT)
4. If it's general (respond: GENERAL)

Email subject: {{subject}}

Email body: {{body}}

Respond with only: SPAM, SALES, SUPPORT, or GENERAL"

Router:

- └─ If SPAM → Delete/Archive
- └─ If SALES → Forward to sales team + Auto-reply with calendar link
- └─ If SUPPORT → Create ticket + Auto-reply "We'll respond in 24h"
- └─ If GENERAL → Auto-reply with FAQ + Forward to you

Test Cases:

- Spam email → Gets archived
- "I want to buy" → Auto-reply sent with booking link
- "Help! Not working" → Support ticket created

Block 2: Lead Qualification Bot

Trigger: Google Form Submission

↓

Module: OpenAI - Create Chat Completion

Prompt: "Analyze this lead and score them Hot/Warm/Cold:

Name: {{Name}}

Email: {{Email}}

Company: {{Company}}

Budget: {{Budget}}

Timeline: {{Timeline}}

Need: {{Need}}

Scoring criteria:

- Hot: Budget >₹50k, Timeline <1 month, Clear need
- Warm: Budget ₹20-50k, Timeline 1-3 months, Vague need
- Cold: Budget <₹20k, Timeline >3 months, Exploring

Respond with ONLY: Hot, Warm, or Cold

Then on new line explain why in 1 sentence."

↓

Router:

- └─ If Hot → Email to you + SMS alert + Add to "Hot Leads" sheet
- └─ If Warm → Email to you + Add to "Warm Leads" sheet + Auto-email nurture sequence
- └─ If Cold → Add to "Cold Leads" sheet + Monthly newsletter

Test Cases:

- High budget + urgent → Classified as Hot
- Low budget → Classified as Cold

Block 3: Appointment Reminder System

Trigger: Google Calendar - Watch Events (daily at 9 AM)

↓

Filter: Events in next 24 hours

↓

For Each Event:

- └─ Extract: Client name, phone, appointment time
- └─ Send SMS: "Hi {{name}}, reminder: Your appointment tomorrow at {{time}}.
Reply YES to confirm or NO to reschedule."
- └─ Add to tracking sheet

Follow-up (4 hours later):

- └─ Check if they replied YES
- └─ If no reply → Send second reminder
- └─ If NO → Trigger rescheduling workflow

Test Cases:

- Appointment tomorrow 3 PM → SMS sent at 9 AM today
- Client replies YES → Marked confirmed
- Client replies NO → Rescheduling email sent

Block 4: Invoice Follow-up

Trigger: Manual (you add invoice to sheet) or Auto (from accounting software)

↓

Schedule: Day invoice is sent

- └─ Day 0: Invoice email sent
- └─ Day 3: "Just checking if you received it"
- └─ Day 7: "Payment due soon - any questions?"
- └─ Day 10: "Payment is due - please confirm"
- └─ Day 14: "Payment overdue - please prioritize"
- └─ Day 21: "Final reminder before late fee"
- └─ Day 30: Alert you to follow up personally

Module: Gmail - Send Email (templated)

Condition: Only send if payment not marked received

Test Cases:

- Invoice sent → Day 3 reminder auto-sent
- Client pays on Day 5 → Remaining reminders cancelled

Block 5: Customer Support Triage

Trigger: Email/Form submission to support@

↓

Module: OpenAI - Analyze Issue

Prompt: "Classify this support request:

Issue: {{description}}

Categories:

1. CRITICAL (service down, data loss, security)
2. HIGH (major feature broken, many users affected)
3. MEDIUM (minor bug, one user)
4. LOW (question, feature request)

Respond: Category + Suggested solution in 2 sentences"

↓

Router:

- └─ CRITICAL → SMS to you + Create urgent ticket + Auto-reply "On it!"
- └─ HIGH → Email to you + Create ticket + Auto-reply "Within 4 hours"
- └─ MEDIUM → Create ticket + Auto-reply "Within 24 hours"
- └─ LOW → Check FAQ database first
 - └─ If answer found → Auto-reply with solution
 - └─ If not found → Create ticket + Standard reply

Test Cases:

- "Website is down" → Classified CRITICAL, SMS sent
- "How do I change password?" → FAQ auto-reply sent

Advanced Automations (Month 4+)

Social Media Auto-Posting

Trigger: New blog post published (RSS/webhook)

Module: OpenAI - Generate social posts

Prompt: "Create 3 social media posts from this blog:

Title: {{title}}

Summary: {{excerpt}}

Generate:

1. LinkedIn post (150 words, professional)
2. Twitter post (280 chars, engaging)
3. Instagram caption (100 words, casual)

Include: 3 relevant hashtags each"

Actions:

- └─ Post to LinkedIn (via Make.com LinkedIn module)
- └─ Post to Twitter (via Make.com Twitter module)
- └─ Save Instagram caption to Google Sheet (for manual posting)

Schedule: Post LinkedIn immediately, Twitter +2 hours, Instagram next day

Smart Meeting Scheduler

Trigger: Email contains "let's schedule" or "book a meeting"

↓

Module: OpenAI - Extract intent

Prompt: "Extract meeting request details:

Email: {{body}}

Return JSON:

```
{  
  "meeting_type": "sales/support/general",  
  "duration": "30/60 mins",  
  "urgency": "asap/this week/flexible",  
  "attendees": ["email1", "email2"]  
}
```

↓

Module: Google Calendar - Find availability

Parameters: Next 7 days, match duration

↓

Module: Gmail - Send reply

"Hi! I have availability:

- {{slot1}}

- {{slot2}}

- {{slot3}}

Click to book: {{calendly_link}}

Sales Scripts & Templates {#sales-templates}

Cold Outreach Templates

LinkedIn DM (Initial)

Hi {{FirstName}},

Noticed you run {{Company}} - helping {{niche}} businesses hit {{pain_point}}.

Built an AI system that [specific benefit, e.g., "cut appointment no-shows by 80%"].

Curious if this is on your radar?

- {{YourName}}

LinkedIn DM (Follow-up after connection)

{{FirstName}}, appreciate the connect!

Quick question: What's eating up most of your team's time right now?

I help {{niche}} automate the boring stuff.

Free audit this week if you're curious: {{calendly_link}}

Zero pitch, just ideas.

Cold Email (Value-First)

Subject: {{Company}} + AI Automation

{{FirstName}},

Most {{niche}} businesses waste 15-20 hours/week on:

- {{pain_1}}
- {{pain_2}}
- {{pain_3}}

We automate all three for {{Company_Type}} businesses.

Recent example:

{{Client}} saved {{X}} hours/week + {{Y}}% better {{metric}}.

Free audit this week: I'll show you 3 things you can automate tomorrow.

30 mins. {{Calendly_link}}

{{YourName}}

{{Phone}}

Audit Call Script

Opening (Minutes 0-5)

YOU: "{{Name}}", thanks for jumping on! How's your day going?"

[Small talk 1-2 mins]

YOU: "So, I saw on your website that {{observation}}. Tell me more about {{Company}}."

[Let them talk 2-3 mins, take notes]

YOU: "That's awesome. And what made you interested in automation specifically?"

THEM: [Reveals pain point]

YOU: "Got it. So {{restate their pain}}. How long has this been an issue?"

Discovery (Minutes 5-15)

Ask in this order:

1. "Walk me through a typical day. Where does your time go?"

[Listen for repetitive tasks]

2. "Of all those tasks, which one frustrates you most?"

[Identify emotional pain]

3. "How much time per week would you say you spend on {{task}}?"

[Quantify the pain]

4. "What happens if this doesn't get done?"

[Understand criticality]

5. "Have you tried solving this before? What happened?"

[Learn from past failures]

IMPORTANT: Let them talk 70% of the time. Take detailed notes.

Demo (Minutes 15-25)

YOU: "Okay, based on what you've shared, I can see exactly how we'd help. Let me show you..."

[Share screen]

YOU: "This is {{Demo_Name}}. Here's how it would work for {{Company}}:

Step 1: {{Explain trigger in their context}}

Step 2: {{Explain automation action}}

Step 3: {{Explain result}}

[Run the demo live]

The result? You'd save roughly {{X}} hours per week. At {{their_hourly_rate}}, that's {{monthly_savings}} per month.

Does this make sense so far?"

THEM: [Questions/concerns]

YOU: [Address each specifically]

YOU: "Let me show you one more thing..."

[Second demo if relevant]

Close (Minutes 25-30)

YOU: "So here's what I'm thinking for {{Company}}:

We'd build:

1. {{Automation 1}} - Saves {{X}} hours/week
2. {{Automation 2}} - Saves {{Y}} hours/week
3. {{Automation 3}} - Saves {{Z}} hours/week

Total time saved: {{X+Y+Z}} hours/week

This would be our {{Package_Name}} package:

- Setup: ₹{{Amount}}
- Monthly: ₹{{Amount}} (includes support + optimization)
- Timeline: {{X}} weeks to full deployment

The ROI: You're getting back {{Total_Hours}} hours/month. Even at ₹500/hour, that's {{ROI_Amount}}/month value for ₹{{Monthly_Cost}} investment.

Make sense? Any questions?"

[Handle objections - see Objection Handling section]

If interested:

YOU: "Great! Here's next steps:

1. I'll email you a simple agreement today
2. Once signed + 50% deposit received, I start building
3. We'll have {{Automation 1}} live within a week
4. Sound good?"

If hesitant:

YOU: "What's holding you back?"

[Listen, then address]

Alternative close:

YOU: "How about this: Let's start with JUST {{Automation 1}}.

₹{{Smaller_Amount}} total.

If you love it, we expand. If not, no hard feelings.

That feel more comfortable?"

Objection Handling

"It's too expensive"

YOU: "I hear you. Let's break it down:

You're spending $\{\{X\}\}$ hours/week on $\{\{task\}\}$.

That's $\{\{X*4\}\}$ hours/month.

At ₹ $\{\{hourly_rate\}\}$ /hour, you're losing ₹ $\{\{monthly_cost\}\}$ in time.

Our solution is ₹ $\{\{your_price\}\}$ /month.

So you're actually SAVING ₹ $\{\{difference\}\}$ /month, plus you get your time back to focus on $\{\{growth_activity\}\}$.

Does that math work better?"

Alternative:

"What budget did you have in mind? Let me see if I can create a smaller package that fits."

"I need to think about it"

YOU: "Totally understand. What specifically do you need to think about?"

[They'll reveal the real objection]

Common answers:

- "Budget" → Address budget concerns
- "Need to discuss with partner" → "Great! Want me to jump on a call with both of you?"
- "Not sure it'll work" → "What would need to be true for you to feel confident?"
- "Timing" → "When would be better? I can hold this price for you until then."

YOU: "How about this: I'll send over everything we discussed. Take 48 hours to think.

We'll hop on a quick 15-min call Tuesday to answer any questions. Fair?"

"Can't we just hire someone?"

YOU: "You could! Let's compare:

Hire someone:

- Salary: ₹30,000-50,000/month
 - Benefits: ₹10,000/month
 - Training: 2-3 months
 - If they leave: Start over
- Total: ₹40,000-60,000/month + risk

Our solution:

- Cost: ₹20,000/month
 - Setup: 2 weeks
 - Never sick, never leaves
 - We handle all updates
- Total: ₹20,000/month, zero risk

Plus, the person you hire could use our automations and be 10x more productive.

Still make sense to hire?"

"We tried automation before, didn't work"

YOU: "What happened?"

[Listen to their story]

YOU: "I hear you. Most automations fail because {{common_reason}}.

Here's how we're different:

1. {{Difference 1}}
2. {{Difference 2}}
3. {{Difference 3}}

Plus, we start small. One automation. Prove it works. Then expand.

How about we start with your biggest pain point only?

₹{{Small_Amount}}.

If it doesn't work in 2 weeks, full refund.

Fair?"

"Let me check with my team"

YOU: "Smart! Who specifically needs to be involved?"

[They'll tell you]

YOU: "Want me to prepare a summary you can share with them?"

Or better yet, want to schedule a quick call with everyone?

I can answer questions directly."

[Goal: Meet all decision makers, or get commitment timeline]

YOU: "When would you typically make a decision like this?"

[Get specific date]

YOU: "Perfect. Let's reconnect on {{Date}}. I'll send a calendar invite."

Pricing Strategy {#pricing}

Service Packages

Package 1: "Starter Automation"

Setup: ₹15,000

Monthly: ₹10,000

Includes:

- 1-2 automation workflows
- Email support (24h response)
- Monthly check-in call (30 min)
- Basic documentation

Best for:

- Businesses testing automation
- Budget: <₹50,000/month revenue
- Single department needs

Margins:

- Setup: 70-80% (mostly your time)
- Monthly: 60-70% (minimal maintenance)

Package 2: "Growth Automation" ★ RECOMMENDED

Setup: ₹35,000

Monthly: ₹20,000

Includes:

- 3-5 automation workflows
- Priority support (4h response)
- Bi-weekly optimization calls
- Advanced documentation
- Monthly performance report

Best for:

- Growing businesses
- Budget: ₹1-5L/month revenue
- Multi-department needs

Margins:

- Setup: 60-70%
- Monthly: 65-75%

Why recommend this:

- Sweet spot for most SMBs
- High enough to be profitable
- Low enough to not scare them

Package 3: "Enterprise Automation"

Setup: ₹75,000+

Monthly: ₹40,000+

Includes:

- Unlimited automations
- Dedicated Slack channel
- Weekly strategy calls
- Custom integrations
- Priority feature development
- Quarterly business review

Best for:

- Established businesses
- Budget: ₹10L+/month revenue
- Complex, multi-system needs

Margins:

- Setup: 50-60% (more complexity)
- Monthly: 70-80% (scale efficiencies)

Productized Pricing (Month 6+)

Product Tier 1: "Essential"

One-time: ₹25,000
(Or: ₹5,000/month for 6 months)

- Includes:
- 3 pre-built automations
 - Self-service setup wizard
 - Video tutorials
 - Email support
 - 30-day money-back guarantee

Target: 50+ customers/month
Margin: 85%+ (digital product)

Product Tier 2: "Professional"

One-time: ₹45,000
(Or: ₹8,000/month for 12 months)

- Includes everything in Essential +
- 6 pre-built automations
 - 1 custom automation
 - Live setup assistance (2 hours)
 - Priority support
 - Monthly optimization tips

Target: 30+ customers/month
Margin: 80%+

Product Tier 3: "Enterprise"

One-time: ₹90,000

(Or: ₹15,000/month for 12 months)

Includes everything in Professional +

- All automations
- Unlimited custom additions
- Dedicated success manager
- Quarterly strategy sessions
- White-glove migration

Target: 10+ customers/month

Margin: 75%+

Pricing Psychology

Anchoring:

Show all 3 packages together:

Starter: ₹25,000 [Basic option]

Growth: ₹55,000 ★ [MOST POPULAR - 70% choose this]

Enterprise: ₹115,000 [Premium option]

Why this works:

- Enterprise makes Growth look reasonable
- "Most Popular" badge creates social proof
- Middle option feels "just right"

Payment Terms:

Option 1: Full payment (5% discount)

- Good for: High-trust clients, small amounts

Option 2: 50% upfront, 50% on completion

- Good for: Most clients, medium amounts
- Recommended for services

Option 3: Monthly installments

- Good for: Long-term relationships, product
- Example: ₹45,000 → ₹8,000/month for 6 months
- Increases total revenue but also churn risk

Upsells:

After Initial Sale:

Month 2: "Add 2 more automations for ₹15,000?"

Month 4: "Upgrade to Growth package? (₹10k/month more)"

Month 6: "Want me to build a custom dashboard? (₹25,000 one-time)"

Average upsell rate: 30-40% of clients

Average upsell value: ₹20,000

Discounting Strategy

When to Discount: ✓ First 3 clients ever (50% off setup) ✓ Referrals (20% off) ✓ Annual payment upfront (10-15% off) ✓ Multiple locations/franchises (volume discount)

When NOT to Discount: ✗ "My budget is X" → Work within their budget, don't discount ✗ They're already convinced → Why give away margin? ✗ Enterprise clients → They expect to pay premium ✗ After you're booked out → Raise prices instead

Discount Scripts:

Referral Discount:

"Since {{Referrer}} sent you, I'm giving you 20% off setup. That's ₹7,000 saved."

First Client Discount:

"You'd be my first {{niche}} client, so I'm offering 50% off setup to build my portfolio."

Annual Prepay Discount:

"If you pay for 12 months upfront, I'll give you 2 months free. That's ₹40,000 savings."

Financial Projections {#financials}

Month-by-Month Revenue (Conservative)

Month 1: ₹0

- Learning phase

- Building demos

- Initial outreach

Expenses: ₹2,000 (tools)

Net: -₹2,000

Month 2: ₹15,000

- 1 client (Starter package)

- Setup: ₹15k

- Monthly: ₹0 (collecting next month)

Expenses: ₹3,000

Net: +₹12,000

Month 3: ₹45,000

- Client 1 monthly: ₹10k

- Client 2 setup: ₹35k (Growth package)

Expenses: ₹5,000

Net: +₹40,000

Month 4: ₹75,000

- Client 1 monthly: ₹10k

- Client 2 monthly: ₹20k

- Client 3 setup + monthly: ₹35k + ₹20k

Expenses: ₹8,000

Net: +₹67,000

Month 5: ₹100,000

- 3 clients monthly: ₹50k

- 2 new setups: ₹50k

Expenses: ₹12,000

Net: +₹88,000

Month 6: ₹150,000

- 5 clients monthly: ₹90k

- 2 new setups: ₹60k

Expenses: ₹15,000

Net: +₹135,000

Month 7-12: ₹200,000-500,000/month

- 10-15 service clients

- Product revenue starts

- Team hired (reduces margins but increases capacity)

Year 1 Summary (Conservative Case)

Total Revenue: ₹15-20 Lakhs

Total Expenses: ₹3-5 Lakhs

Net Profit: ₹12-15 Lakhs

Profit Margin: 70-80%

Expense Breakdown

Month 1-3 (Bootstrap):

Make.com: ₹0-800/month
OpenAI API: ₹1,500/month
Domain + Hosting: ₹500/month
Calendly: ₹0
LinkedIn: ₹0
Total: ₹2,000-3,000/month

Month 4-6 (Growing):

Tools: ₹8,000/month
Marketing: ₹5,000/month
Freelance help: ₹10,000/month (optional)
Total: ₹15,000-25,000/month

Month 7-12 (Scaling):

Tools: ₹15,000/month
Marketing: ₹30,000/month
Team (2 people): ₹1,00,000/month
Office/Co-working: ₹15,000/month
Misc: ₹10,000/month
Total: ₹1,50,000-2,00,000/month

Break-Even Analysis

Scenario 1: Solo (No team)

Monthly Expenses: ₹15,000
Required Revenue: ₹15,000
Break-even: 2 clients on monthly retainer
Timeline: Month 3-4

Scenario 2: With 1 Assistant

Monthly Expenses: ₹55,000
Required Revenue: ₹55,000
Break-even: 3-4 clients
Timeline: Month 5-6

Scenario 3: With Full Team

Monthly Expenses: ₹1,80,000

Required Revenue: ₹2,50,000 (for profit)

Break-even: 10-12 clients

Timeline: Month 10-12

Risk Mitigation {#risks}

Risk 1: Can't Find Clients

Probability: High (Month 1-2)

Mitigation:

- Cast wider net (try 2-3 niches)
- Offer FREE first automation (portfolio building)
- Lower prices initially (₹10k instead of ₹15k)
- Partner with complementary services (web designers, accountants)
- Join local business groups (BNI, Chamber of Commerce)

Backup Plan: Get part-time job/freelance work to cover expenses while building

Risk 2: Can't Deliver Technical Solution

Probability: Medium

Mitigation:

- Start with simple automations (email, scheduling)
- Use no-code tools (Make.com, Zapier)
- Hire freelancer for complex builds (₹5-10k per project)
- Under-promise, over-deliver
- Build buffer time in estimates (2 weeks → tell client 3 weeks)

Backup Plan: Offer refund, learn from failure, try simpler project next time

Risk 3: Client Doesn't Pay

Probability: Low-Medium

Mitigation:

- ALWAYS get 50% upfront

- Use simple contract/agreement
- Set clear payment terms (Net 7 days)
- Pause service if payment late
- Build late fee into agreement (2% per week)

Backup Plan: Stop work immediately, legal notice if large amount, learn for next time

Risk 4: Automation Breaks / Client Unhappy

Probability: Medium

Mitigation:

- Set realistic expectations ("This will handle 80% of cases")
- Build error notifications (you know immediately if something fails)
- Test thoroughly before handoff
- Provide clear documentation
- Offer 2-week warranty period

Backup Plan: Fix immediately (even if it takes extra time), offer discount if major issue

Risk 5: Scope Creep

Probability: High

Mitigation:

- Define exact deliverables in agreement
- "Additional requests are ₹X per automation"
- Weekly check-ins to manage expectations
- Say no when necessary: "That's out of scope for this package, but we can add it for ₹Y"

Backup Plan: Absorb small requests to keep client happy, but set boundary early

Risk 6: Burn Out

Probability: High (Month 2-4)

Mitigation:

- Set working hours (don't work 24/7)
- Take 1 day off per week minimum
- Don't take on more than you can handle

- Hire help once revenue allows
- Automate YOUR OWN business (ironic but important)

Backup Plan: Pause new client acquisition, catch up on existing work, rest

Risk 7: Competition

Probability: High (Month 6+)

Mitigation:

- Specialize deeply in one niche
- Build relationships (hard to replicate)
- Move fast (first mover advantage)
- Focus on service quality over price
- Build productized offerings (harder to compete with)

Backup Plan: Pivot to new niche or productize faster

Risk 8: Technology Changes (AI, platforms)

Probability: Medium

Mitigation:

- Stay updated (follow AI news, Make.com updates)
- Build platform-agnostic solutions where possible
- Join communities (Make.com forums, AI Discord groups)
- Budget for learning time (5 hours/week minimum)

Backup Plan: Pivot to new technologies as they emerge

Success Metrics & KPIs

Month 1-3: Validation Metrics

- ✓ Demos built: 2-3
- ✓ Outreach messages sent: 200+
- ✓ Response rate: >10%
- ✓ Calls booked: 5+
- ✓ Clients closed: 1-2
- ✓ Revenue: ₹30,000+

Month 4-6: Growth Metrics

- ✓ Active clients: 5-8
- ✓ Monthly recurring revenue (MRR): ₹1,00,000+
- ✓ Client retention: >80%
- ✓ Average deal size: ₹40,000+
- ✓ Gross margin: >70%

Month 7-12: Scale Metrics

- ✓ Active clients: 15+
- ✓ MRR: ₹3,00,000+
- ✓ Customer acquisition cost (CAC): <₹10,000
- ✓ Lifetime value (LTV): >₹2,00,000
- ✓ LTV:CAC ratio: >20:1
- ✓ Team size: 2-4 people

Final Checklist

Before You Start

- ☐ Can you survive 2 months with ₹0 income?
- ☐ Do you have 60+ hours/week to dedicate?
- ☐ Are you comfortable talking to business owners?
- ☐ Do you have basic technical skills (or willing to learn)?
- ☐ Have you chosen your niche?

Week 1 Complete

- ☐ Make.com account created & tutorial done
- ☐ OpenAI account created & tested
- ☐ Demo 1 built (email responder)
- ☐ Demo 2 built (lead qualifier)
- ☐ Screen recordings of both demos

Week 2 Complete

- ☐ Niche selected
- ☐ 3 service packages defined
- ☐ LinkedIn profile updated
- ☐ Calendly set up
- ☐ 50 prospects identified

Month 1 Complete

- ☐ 100+ outreach messages sent
- ☐ 5+ audit calls completed
- ☐ 1+ client signed
- ☐ First payment received
- ☐ Project scope documented

Month 3 Complete

- ☐ 3+ active clients
- ☐ ₹50,000+ MRR
- ☐ Case study created
- ☐ Referrals asked for
- ☐ Process documented

Month 6 Complete

- ☐ 8+ active clients
 - ☐ ₹1,50,000+ MRR
 - ☐ Productized offering launched
 - ☐ Marketing system in place
 - ☐ Considering first hire
-

Resources & Learning

Free Courses

- [Make.com Academy \(make.com/en/academy\)](https://make.com/en/academy)

- [Google Apps Script Tutorials \(YouTube\)](#)
- ["No Code MBA" \(YouTube channel\)](#)

Paid Courses (Optional)

- Udemy: "Complete Make.com Course" (~₹500)
- Udemy: "OpenAI API Masterclass" (~₹500)

Communities

- [Make.com Community Forum](#)

- Reddit: r/nocode, r/entrepreneur
- LinkedIn Groups for your niche

Tools to Explore Later

- Bubble.io (no-code app builder)
 - Airtable (database + automations)
 - n8n (open-source Make.com alternative)
 - LangChain (advanced AI integrations)
-

Conclusion

You now have a complete blueprint to go from ₹0 to ₹10L+/month with AI automation services.

The reality:

- Month 1-2 will be hard (learning, rejection)
- Month 3-4 will be exciting (first clients, revenue)
- Month 5-6 will be chaotic (growth, systems needed)
- Month 7-12 will be rewarding (scale, team, freedom)

Success factors:

1. **Consistency:** Outreach every single day
2. **Quality:** Deliver more than promised
3. **Speed:** Move fast, learn fast
4. **Focus:** Pick one niche, master it
5. **Resilience:** Rejection is normal

Your next step: Close this document. Open Make.com. Build your first demo TODAY.

Good luck! 🚀
